

Undergraduate Assistant (Peer Learning) Sessions and Step-Up Program

These are small group discussions and Q&A (20 students maximum).

If a session is full attend a different one.

Students may know the chemistry concept but still have difficulty solving a problem.

Ask any math related question. How to problem solve? Units, dimensional analysis, etc.

28 HOURS PEER LEARNING SESSIONS EVERY WEEK!

GO TO AS MANY AS POSSIBLE!

Work in groups. Assist each other. Have fun. 😊

Step-Up sessions go through step-by-step fundamentals working through prepared topics and worksheets for students who want step-by-step assistance.

Drop-In sessions are for all students to ask questions and get involved in discussion.

Workshops involve working through prepared topics and worksheets for students with a stronger chemistry background.

Step-Up Program: Created by Dr. Lavelle to assist students who are really struggling and want to succeed (Step-Up). These Step-Up Sessions emphasize chemistry step-by-step fundamentals.

Dr. Lavelle created the Undergraduate Assistant (UA) program for lecture courses at UCLA.
